

- matrix_13
- Regulation of neuron migration
 - Regulation of ERBB signaling
 - Regulation of intracellular pH
 - Presynapse assembly
 - Presynaptic membrane assembly
 - Regulation of necroptosis
 - Plasma membrane organization
 - Positive regulation of exocytosis
 - Axon guidance
 - Calcium ion transport
 - Cytosolic calcium ion transport
 - Negative regulation of cell communication
 - Positive regulation of neuron differentiation
 - Inositol phosphate metabolism
 - Negative regulation of amyloid precursor protein catabolism
 - Regulation of release of sequestered calcium ion into cytosol by sarcoplasmic reticulum
 - Synapse assembly
 - Calcium ion transmembrane import into cytosol
 - Chemical synaptic transmission
 - Modulation of excitatory postsynaptic potential
 - Calcium-mediated signaling
 - Chemical synaptic transmission, postsynaptic
 - Regulation of dendrite development
 - Regulation of postsynaptic membrane potential
 - Regulation of release of sequestered calcium ion into cytosol
- matrix_14
- Regulation of DNA repair
 - Negative regulation of immune effector process
 - I-kappaB kinase/NF-kappaB signaling
 - Glial cell development
 - Cytosolic transport
 - Vesicle-mediated transport between endosomal compartments
 - Negative regulation of endocytosis
 - Axon extension
 - Positive regulation of receptor activity
 - Adenylate cyclase-inhibiting GPCR signaling
 - Glutamate receptor signaling
 - Modulation of chemical synaptic transmission
 - Regulation of synaptic transmission, glutamatergic
 - Clathrin-dependent endocytosis
 - Synaptic vesicle recycling
 - Vesicle-mediated transport in synapse
 - Cellular response to amyloid-beta
 - Regulation of calcium ion transmembrane transporter activity
 - Response to amyloid-beta
 - Receptor localization to synapse
 - Negative regulation of neuron projection development
 - Regulation of calcium-mediated signaling
 - Negative regulation of cell projection organization
 - Positive regulation of synapse assembly
 - Regulation of synapse assembly
 - Axon development
 - Regulation of axon extension
 - Membrane depolarization
 - Regulation of calcium ion transport into cytosol
 - Synaptic vesicle endocytosis
 - Regulation of axonogenesis
 - Regulation of neuron projection development
 - Positive regulation of synaptic transmission
 - Regulation of calcium ion-dependent exocytosis
 - Positive regulation of neuron projection development
