```
mitterhandrial protein processing (0.000039892)
regulation of RB to Oldy vescion-mediated transport (0.0000603)
regulation of RB to Oldy vescion-mediated transport (0.0000603)
negative regulation of ERM body vescion-mediated transport (0.0000603)
regulation of studying of motorchedrial (0.0000603)
regulation of studying of motorchedrial (0.0000603)
regulation of studying of motorchedrial (0.0000603)
regulation of studying of the control (0.0000603)
phospholipase Cathority S, Synaptic treamstoon, glutamatery (0.0000604)
positive regulation of relative profession in our transport (0.0000604)
profession and treating transport (0.0000604)
profession of the control of the
gulation of calcium ion transmembra
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Excitatory Inhibitory Astrocyte Microglia Oligodendrocyte Oligodendrocyte
