negative regulation of ERAD pathway (GO:1904293)
                                                                negative regulation of innate immune response (GO:0045824)
                                                                                             myelin assembly (GO:0032288)
                                                                        anterograde synaptic vesicle transport (GO:0048490)
                                                                   synaptic vesicle transport along microtubule (GO:0099517)
                                                                        regulation of neuron apoptotic process (GO:0043523)
                                               positive regulation of small GTPase mediated signal transduction (GO:0051057)
                                                                  positive regulation of lipid metabolic process (GO:0045834)
                                                                  positive regulation of amyloid-beta clearance (GO:1900223)
                                  regulation of extrinsic apoptotic signaling pathway via death domain receptors (GO:1902041)
                                                                           negative regulation of neurogenesis (GO:0050768)
                                                                                     regulation of endocytosis (GO:0030100)
                                                                                   regulation of ATPase activity (GO:0043462)
                                                                positive regulation of adenylate cyclase activity (GO:0045762)
                                                                    positive regulation of sodium ion transport (GO:0010765)
                                                                                neuron projection regeneration (GO:0031102)
                                                       positive regulation of mitochondrial membrane potential (GO:0010918)
                                                                             cellular response to amyloid-beta (GO:1904646)
                                                                                 acute inflammatory response (GO:0002526)
                                                  negative regulation of cAMP-dependent protein kinase activity (GO:2000480)
                                                    regulation of release of sequestered calcium ion into cytosol (GO:0051279)
                                                                regulation of calcium ion-dependent exocytosis (GO:0017158)
                              energy coupled proton transmembrane transport, against electrochemical gradient (GO:0015988)
                                       phospholipase C-activating G-protein coupled receptor signaling pathway (GO:0007200)
                                                       G-protein coupled glutamate receptor signaling pathway (GO:0007216)
                                    adenylate cyclase-modulating G-protein coupled receptor signaling pathway (GO:0007188)
                                                                        negative regulation of lipid localization (GO:1905953)
                                                                             calcium ion transport into cytosol (GO:0060402)
                            adenylate cyclase-inhibiting G-protein coupled glutamate receptor signaling pathway (GO:0007196)
                                                                 positive regulation of immune system process (GO:0002684)
                                                                               anion transmembrane transport (GO:0098656)
                                                                        positive regulation of immune response (GO:0050778)
                                                                                    regulation of ion transport (GO:0043269)
                                                                       angiotensin-activated signaling pathway (GO:0038166)
                      regulation of calcium ion transmembrane transport via high voltage-gated calcium channel (GO:1902514)
                                                                                      potassium ion transport (GO:0006813)
                                                                       positive regulation of receptor recycling (GO:0001921)
                                                                     PERK-mediated unfolded protein response (GO:0036499)
                                                                                     regulation of myelination (GO:0031641)
                                                       regulation of amyloid precursor protein catabolic process (GO:1902991)
                                                             positive regulation of neurological system process (GO:0031646)
                                                                                 extracellular matrix assembly (GO:0085029)
                                                                                                  endocytosis (GO:0006897)
                                                                               plasma membrane organization (GO:0007009)
                                                                                   retrograde axonal transport (GO:0008090)
                                                                  gamma-aminobutyric acid signaling pathway (GO:0007214)
                                                                                neuron projection organization (GO:0106027)
                                                                        regulation of SNARE complex assembly (GO:0035542)
                                                                        regulation of membrane depolarization (GO:0003254)
                                                                                     acylglycerol homeostasis (GO:0055090)
                                                                             axonal transport of mitochondrion (GO:0019896)
                                                      regulation of delayed rectifier potassium channel activity (GO:1902259)
                                                                            cellular potassium ion homeostasis (GO:0030007)
positive regulation of aspartic-type endopeptidase activity involved in amyloid precursor protein catabolic process (GO:1902961)
                                                                calcium ion transmembrane import into cytosol (GO:0097553)
                                                                              excitatory postsynaptic potential (GO:0060079)
                                                  positive regulation of mitochondrial calcium ion concentration (GO:0051561)
                                                        negative regulation of neural precursor cell proliferation (GO:2000178)
                                                                negative regulation of immune effector process (GO:0002698)
                                        negative regulation of endoplasmic reticulum unfolded protein response (GO:1900102)
                                                                 positive regulation of innate immune response (GO:0045089)
                                                                           cellular response to sterol depletion (GO:0071501)
                                                                                  regulation of intracellular pH (GO:0051453)
                                           negative regulation of release of sequestered calcium ion into cytosol (GO:0051280)
                                                                                  regulation of axon extension (GO:0030516)
                                                                  chemical synaptic transmission, postsynaptic (GO:0099565)
                                                                regulation of postsynaptic membrane potential (GO:0060078)
                                                              negative regulation of cell projection organization (GO:0031345)
                                                         negative regulation of neuron projection development (GO:0010977)
                                                                        regulation of synaptic vesicle transport (GO:1902803)
                                                                       regulation of synaptic vesicle exocytosis (GO:2000300)
                                                                 regulation of calcium ion transport into cytosol (GO:0010522)
                                                                             regulation of extent of cell growth (GO:0061387)
                                                                             protein localization to cell surface (GO:0034394)
                                                                                         potassium ion import (GO:0010107)
                                                                                    potassium ion homeostasis (GO:0055075)
                                                                          I-kappaB kinase/NF-kappaB signaling (GO:0007249)
                                                                      regulation of dendritic spine maintenance (GO:1902950)
                                                                          inositol phosphate dephosphorylation (GO:0046855)
                                                                              regulation of necroptotic process (GO:0060544)
                                                                   amyloid precursor protein metabolic process (GO:0042982)
                                                                                     ATP generation from ADP (GO:0006757)
                        regulation of endoplasmic reticulum stress-induced intrinsic apoptotic signaling pathway (GO:1902235)
                                                                                               vesicle docking (GO:0048278)
                                                                           negative regulation of phagocytosis (GO:0050765)
                                                                    amyloid precursor protein catabolic process (GO:0042987)
                                                              positive regulation of adaptive immune response (GO:0002821)
                                                                                          myelin maintenance (GO:0043217)
                                                                               regulation of calcium ion import (GO:0090279)
